-----

In selecting the energy storage system, our RF battery was selected due to its long lifespan and its low risks of both degradation from long-term operation and fire due to ignition. The ...

Sumitomo Electric has announced the launch of its advanced vanadium redox flow battery (VRFB) at the Energy Storage North America (ESNA) event, taking place at the San Diego ...

Japanese manufacturer Sumitomo Electric has released a new vanadium redox flow battery (VRFB) suitable for a variety of long-duration configurations. Unveiled at Energy Storage ...

In recent years, there have been developments to overcome the challenges in energy production associated with the performance of vanadium redox flow batteries (VRFBs). This segment ...

Sumitomo Electric has inaugurated a vanadium redox flow battery (VRFB) system at a community solar microgrid in southern Japan.

Sumitomo Electric will begin accepting orders for the new VRFB in 2025. This development builds on Sumitomo Electric's decades of expertise in vanadium redox flow battery ...

Sumitomo Electric vanadium redox flow battery and SEMSA have been selected to power the Kurokiyama Solar Plant in Japan.

Unveiled at Energy Storage North America (ESNA), held in San Diego from Feb. 25-27, 2025, the system applies "newly developed long life materials" which allows for a 30-year operational ...
