We will push ahead on a solar rooftop revolution, while tackling the barriers of planning, grid, supply chains and skills. Publishing this Roadmap is just the beginning of our journey - and we...

Building regulations in England support growth in demand for rooftop solar as new-build properties make up significant share of small-scale PV installations. Strong installations in first...

In the summer half-year from April to September 2016, UK solar panels produced more electricity (6,964 GWh) than did coal power (6,342 GWh); each meeting about 5% of demand.

Families could save around £500 a year on their energy bills by installing rooftop solar panels as part of the government's rooftop revolution - making working people better off through the...

To support this ambition, the UK Solar Taskforce was set up and it has now published the UK Solar Roadmap. The plan outlines that only about 0.4% of the UK's land would be necessary for ...

Whether you're running a school, a farm, a public building or a large commercial facility, we design systems that maximise return on investment and help you play a meaningful part in the ...

The Government's plans to mandate rooftop solar panels for all new-build homes under the upcoming Future Homes Standard have been widely welcomed as a step forward for achieving ...

OverviewHistorySolar potentialRooftop solarLarge-scale solar farmsPlanning considerationsGovernment programmesFutureIn 2006, the United Kingdom had installed about 12 MW of photovoltaic capacity, which represented only 0.3% of total European solar PV of 3,400 MW. In August 2006, there was widespread news coverage in the United Kingdom of the major high street electrical retailers Currys' decision to stock PV modules, manufactured by Sharp, at a cost of £1,000 per module. The retailer also provided an installation service.
