What are edgerack integrated micro data center cabinets?

The EdgeRack integrated micro data center cabinets were manufactured to solve networking problems common to organizations across the globe. They're suitable for businesses big and small and are deployable in both traditional and non-traditional IT environments.

What is edge computing & how does it work?

Edge computing is a distributed computing framework with the goal of processing data closest to where it's actually generated (Ex. IoT devices, sensors, local servers, etc.). Doing so reduces network latency, saves bandwidth, and gives businesses near real-time insights.

Are VWM cabinets PCI compliant?

The VWM series is available in two distinct versions--full door and split door--for dual user access, and both feature locking doors for PCI compliance. The VWM series cabinet is capable of housing a complete network, including up to 8RU of traditional rack mount equipment, power, thermal management and connectivity.

Data-center-tested network/server cabinet offers secure installation of 19" equipment, flexible use of accessories for power and data cabling, integrated cooling air routing, and high-quality protection ...

Wall-mounted cabinets provide networking/server capacity when floor-space isn't an option in a variety of indoor and outdoor environments, designed with both installation and daily-use in mind

Sound-proof & floor standing cabinets help to store edge-servers in open offices and ROBO applications. Up to 20dB noise reduction for conference rooms and open offices. Up to 24U with ...

Deploy the cabinet for a low-profile, edge solution that can support any application. Learn how the Vertical Wall-Mount cabinet supports networking and IT installations.

Explore how outdoor telecom cabinets support edge computing deployments, improve network performance, and reduce latency by housing localized data processing equipment.

Explore what Edge computing is and how it (and the right IT enclosure system) can handle scalability, security, protection, disruptors, and standalone solutions.

House your entire edge computing infrastructure in a single secure, prefabricated micro data center cabinet

with self-contained cooling, monitoring, & more.

Compared with traditional large data centers, micro data centers have a smaller size, lower energy consumption, and higher flexibility, and are suitable for edge computing, remote office, retail stores, ...
