Next-generation battery management systems maintain optimal operating conditions with 45% less energy consumption, extending battery lifespan to 20+ years. Standardized plug-and-play designs ...

In just six months -- under shelling, blackouts, and wartime restrictions -- Ukraine completed Eastern Europe's largest battery storage project: 200 megawatts / 400 megawatt-hours of ...

In this project, the inverter was installed indoors, while the liquid-cooled battery cabinet was installed outdoors, fully exposed to cold weather conditions.

The project consists of six energy storage installations across Ukraine, capable of providing 400 MWh of dispatched energy, sufficient for short-term power supply to 600,000 households.

Discover how solar and batteries are transforming Ukraine's energy landscape and improve the country's resilience and energy independence.

DTEK has energised the largest battery storage project in the war-torn country and one of the biggest ones in Eastern Europe. The 200 MW/400 MWh installation spans six sites ranging ...

Located in the Kyiv region of Ukraine, this project is designed for a local factory to ensure uninterrupted production during power outages. The system comprises 4 units of 50kWh + 2 units of 100kWh ...

The project was developed in partnership with American energy company Fluence Energy Inc. The 200-megawatt system spans six locations across Ukraine and represents one of Eastern ...
