Duke Energy Overview: Regulated Utilities Florida o 50 MW under construction (6 sites) DEP / DEC (Carolina's Total)

In addition, the system provides the entire community with on-site backup power, meaning that it is less likely to experience blackouts during heavy storms -- no small concern in Florida, ...

When Hurricane Ian hit Florida, Georgia, Virginia and the Carolinas in 2022, more than two million people lost power. But microgrids kept critical services running at hospitals, universities,...

Building a microgrid is more appealing and more doable than ever before. Solar-plus-battery microgrids (unlike generators) are not susceptible to the fossil supply chain issues that hit ...

Purchasing power off-peak only is a win-win for the utility and the microgrid community, as it keeps prices low for customers, and enables the utility to avoid using natural gas-fired peaker plants for ...

Florida public power utility OUC is collaborating with Capacitech Energy in a microgrid project to demonstrate Capacitech Energy's largest deployment to date of the PowerLink, a cable ...

It's generally more difficult for private developers to build sophisticated microgrids in states like Florida that did not undergo industry restructuring. Utilities in these states have more monopoly sway.

Microgrids will be key to managing the fluctuating energy demands of tourism islands in the future. Trinasolar aims to green up more destinations and enable their sustainable growth ...
