To find your Tesla Serial Number (TSN), you can check the Tesla App or your physical Tesla Powerwall battery. From the Home screen, navigate to Settings and select My Home Info

The serial number of the inverter can be found at the bottom of the inverter label which is located on the right side of the inverter. It is important the second string of numbers, following the first ...

Where can I find the serial number (SN) of the inverter?

Find the number labeled Serial Number -- it's a mix of letters, numbers, and hyphens. Take a photo of the full serial number. If you have more than one inverter, copy each serial number.

The serial number is your Site ID - a 7 digit number sequence - which can be found on the SolarEdge app, under the Site Details menu item. See the following example:

The serial number, usually ten digits long, is indicated on the type label on the front cover of the inverter. Alternatively, the serial number can be read off via a data logger:

A serial number allows a company to identify a product and get additional information about it for replacement or to investigate it. For our inverters we may require a serial number to ...

Once the system has been installed but before it has been set up, confirm each device serial number matches the serial number listed in Tesla One. This step is critical to ensure the customer sees their ...
