Is there a secret radio in a solar inverter?

Every solar panel and battery connected to the U.S. energy grid relies on a device few people ever consider: the power inverter. In May of 2025, U.S. experts found undocumented communication modules and secret radios embedded in some Chinese-manufactured solar inverters and battery systems.

Are Chinese solar power inverters Rogue?

However, rogue communication devices not listed in product documents have been found in some Chinese solar power inverters by U.S. experts who strip down equipment hooked up to grids to check for security issues, the two people said.

What is a solar inverter?

Inverters are the workhorses of modern power systems. They convert solar panels' DC output to grid-friendly AC output, linking batteries and electric vehicles to public utility networks. They are ubiquitous in renewable energy infrastructure, and a majority are produced in China.

Utility Products List covers all Utility Products, including inverters, energy storage, optimizers, controllers and other Utility Products photovoltaic-related product series.

It provides smart PV solutions for residential, commercial, industrial, utility scale, energy storage systems, and microgrids. It builds a product ecosystem centered on solar inverters, charge ...

Hybrid inverters allow intelligent switching and load optimization, enabling the system to prioritize solar during the day and batteries at night, while drawing from the grid only when necessary.

How many countries have deployed Huawei's 5G base stations Huawei has deployed its 5G base stations in several countries worldwide, including China, South Korea, UAE, Switzerland, and Canada.

LONDON, May 14 (Reuters) - U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained...

One of the important technological innovations of the project is the application of more than 3,000 Huawei
