Brazil's adoption of 5G technology is expected to rapidly scale, with over 30,000 5G base stations expected to be installed across the country by 2028.

The coverage has been achieved via the deployment of 14,796 5G base stations, almost a thousand of which had been deployed between June and July this year. Achieving this level of ...

Learn how Brazil is expanding 5G deployment to 194 more municipalities with the 3.5 GHz band, enhancing connectivity for over 94.5% of the population.

These figures tell us something powerful: Brazil has both the demand and the density to support scalable 5G networks -- but we're not deploying at scale fast enough.

Brazil's telecoms regulator Anatel announced 94.5% of Brazilian will theoretically have access to 5G from today (September 2) after releasing licences to operators for spectrum in the 3.5 ...

Here's how Brazil's 5G licensees are making progress years after Brazil's multi-band 5G spectrum auction closed, according to telecom data.

5G continues to make gradual progress in Brazil, reaching 24.3 million accesses (9.4% of all mobile accesses) at the end of March, with two major providers accounting for the majority of ...

Major telecom operators and network equipment providers in Brazil are investing heavily in upgrading their infrastructure to 5G technology, including base stations, small cells, and edge computing facilities.
