When was wind energy first discovered? It is believed that Professor James Blyth made this ground-breaking discovery in 1887. A year later, wind energy made it to the United States as ...

Following experience with reconditioned 1930s wind turbines, a new generation of American manufacturers started building and selling small wind turbines not only for battery-charging but also ...

In 1 AD, mathematician Heron of Alexandria invented a wind-powered organ. A piston forced the air through the pipes, creating sounds similar to the flute. While this was mainly a novelty instrument, it ...

In the late 1880s and 1890s, both Brush and la Cour were indeed pioneers of wind-generated electrical power, and the latter was responsible for numerous developments that enabled ...

An important moment in history for wind power was during the US energy crisis of the 1970s, which forced researchers and leaders to explore alternative energy options.⁷ Development ...

Nearly a century before anyone thought seriously about wind-powered electricity, a Scotsman named James Blyth built the world's first wind turbine in his front yard.

Follow the history of wind from windmills to modern day wind turbine generators. Information covering ancient wind power history to present day wind technology.

People used wind energy to propel boats along the Nile River as early as 5,000 BC. By 200 BC, simple wind-powered water pumps were used in China, and windmills with woven-reed ...
