The Global Wind Atlas is a free, web-based application developed to help policymakers, planners, and investors identify high-wind areas for wind power generation virtually anywhere in the world, and then ...

This starts to paint a better picture of the techniques used in America, where it is important to assess the quality and effectiveness of each state when implementing renewable energy sources.

Texas is by far the state with the highest wind energy production in the United States. In 2024, Texas generated roughly 124.94 terawatt-hours of wind power.

Wind energy generation by region Measured in terawatt-hours. Includes both onshore and offshore wind sources.

Wind energy generation varies by state. Discover the states with the most wind energy in Choose Energy's February 2026 Wind Generation Report.

Find maps and charts showing wind energy data and trends.

Climate Central's report, A Decade of Growth in Solar and Wind Power, analyzed U.S. solar and wind energy data from 2014 to 2023 for all 50 states and the District of Columbia. Download...

The United States Wind Turbine Database (USWTDB) provides the locations of land-based and offshore wind turbines in the United States, corresponding wind project information, and turbine technical ...
