Econet commissioned 77 new base stations, modernised 546 radio access sites, and upgraded 365 microwave links. In a bold step to extend broadband access, 60 5G sites were ...

This development is part of NetOne's broader strategy to transform Zimbabwe's economy into a tech-driven powerhouse. In addition to launching 5G, NetOne has deployed 275 4G base ...

The second quarter of 2025 marked a decisive moment in Zimbabwe's connectivity journey, with the nation recording a total of 469 new base station deployments across 2G, 3G, LTE, ...

The increase in 5G base stations is expected to drive economic growth, as more people access digital services and online opportunities. Zimbabwe's mobile sector is poised for further ...

Base station operators deploy a large number of distributed photovoltaics to solve the problems of high energy consumption and high electricity costs of 5G base stations.

This solution, powered by an AI engine, ensures real-time power optimization and provides extended autonomy, a critical improvement for base stations often affected by power cuts ...

While 5G base stations are growing rapidly, the report highlights that operators are still prioritising the addition of more 4G towers, which is wise. This suggests that 5G coverage remains largely ...

While this technology can drive digital transformation, it is unclear whether it will be targeted at bridging Zimbabwe's existing connectivity gaps. If similar models are applied in ...
